# Taylor Wimpey

*Taylor Wimpey was formed by the merger of George Wimpey and Taylor Woodrow in 2007. We have a history dating back to the 19th Century. We are one of the largest homebuilders in the UK, completing over 14,500 homes each year.*

*Planning sustainable communities*

*More than building homes*

*Green spaces*

*Energy efficient homes*

*We embrace diversity and inclusion in our policies and practices*

*Engaging with local people*

*"Our aim is to be the nation's leading residential developer for creating value and delivering quality. We are passionate about working with local people, businesses, local authorities and our customers to build aspirational homes"*

*Taylor Wimpey lays the foundations for thriving communities*

**£345m**

*contributed to local communities*

*Improvements to public transport*

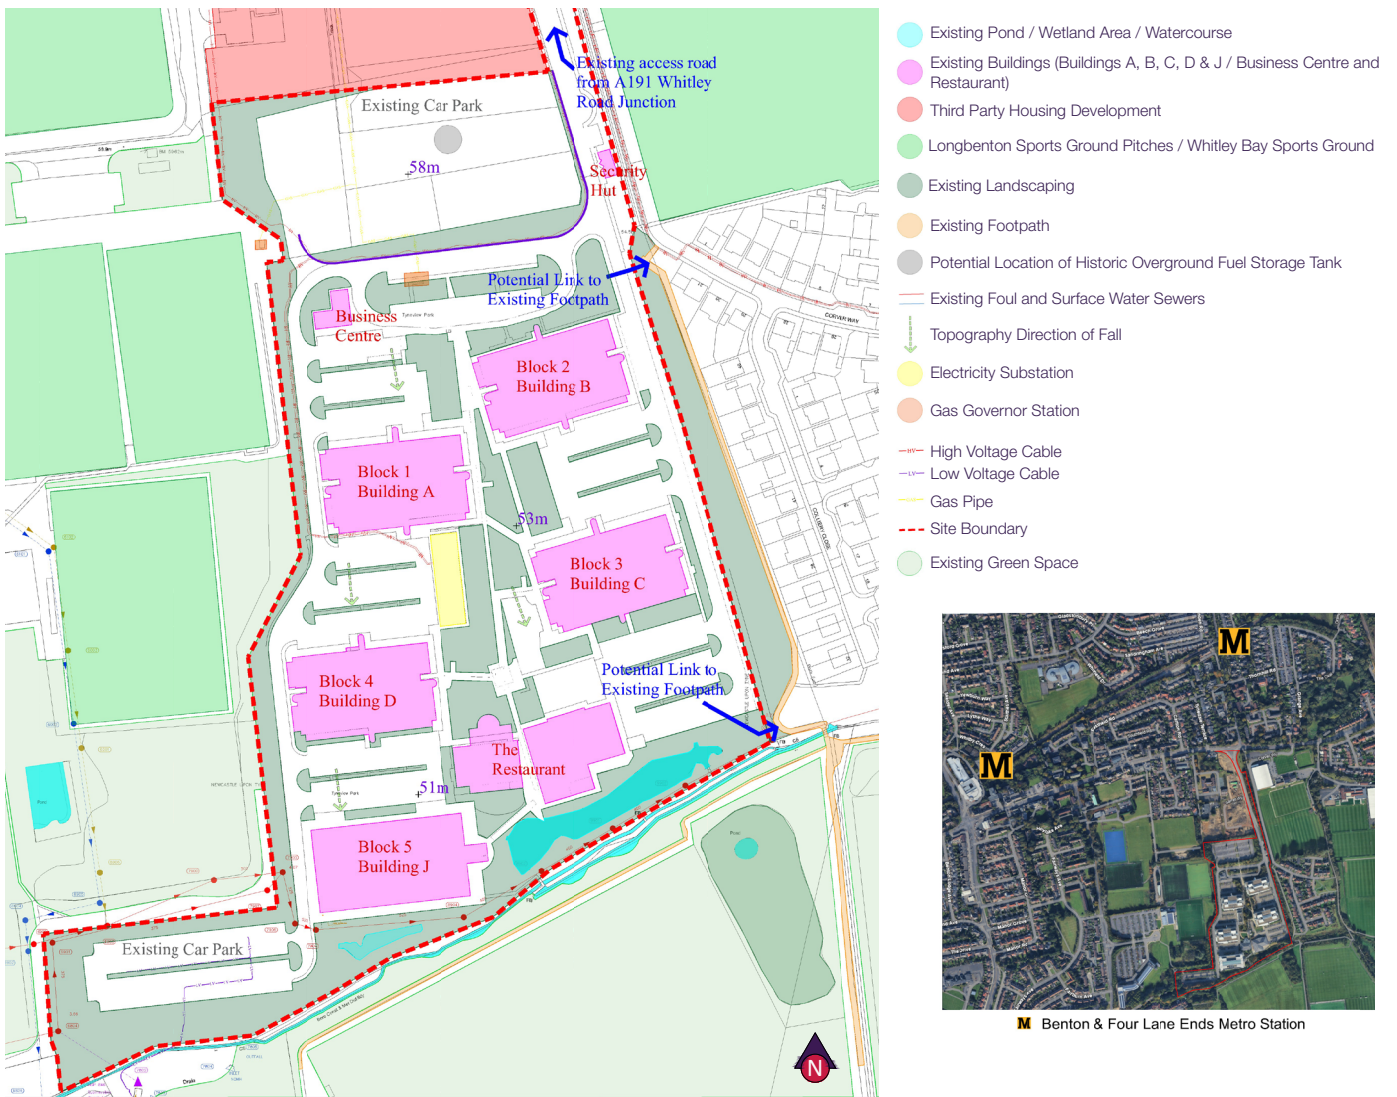

*Landscaping, sports and play areas*

# Site Considerations

*Information about the site we need to take into account*

Before we begin designing a new development, we conduct a thorough assessment of the site and its surrounding area. We document the key features that impact our design. All relevant factors - whether they dictate design constraints or present opportunities to enhance elements are detailed here.

## Things to think about

Access to the site and possible improvements to existing footpath networks

The topography of the site, considering the levels and retention that may be required

Existing vegetation and roads; and where we can retain, maintain, and enhance

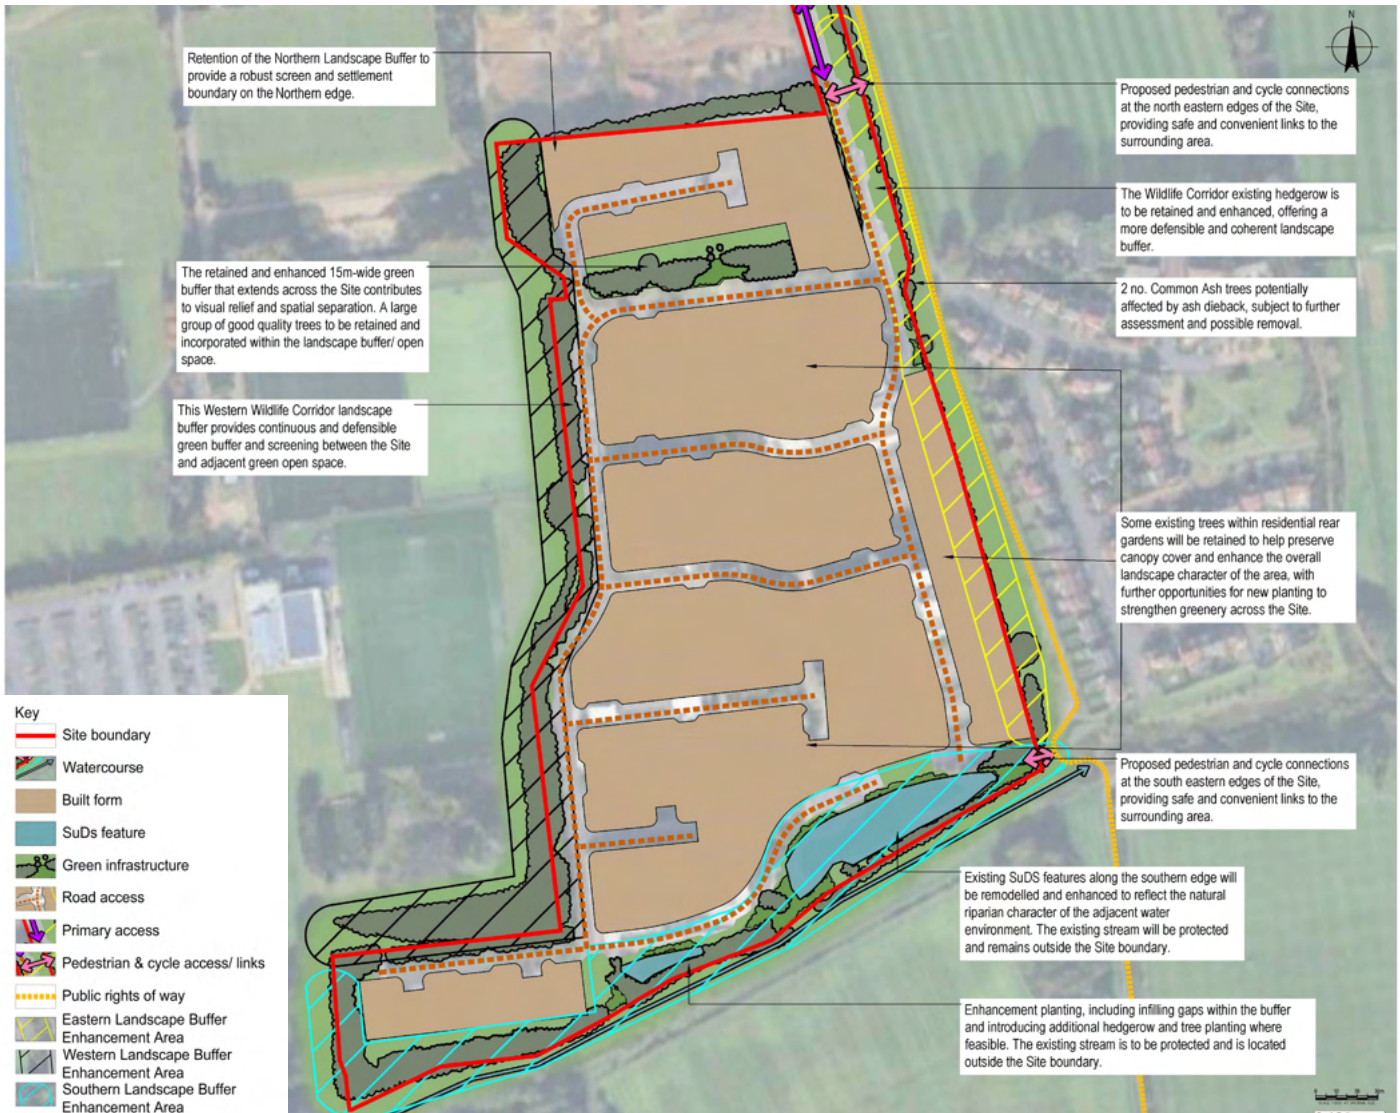

Are there any utilities and drainage which feed the site. The location of the existing network and how we can tie in

# Design Process

## *How we approach the design of a site*

Although in the very early stages, we have begun to develop a plan, illustrating how the technical design could be applied. The proposals are guided by key site features and opportunities such as connectivity and ensuring they reflect the character of the local area.

### Design Development Plan

## What we need to take into consideration

Incorporation of positive drainage via SuDs ponds

Creating a sense of character and community

Well located and managed open space

Provide connectivity to existing facilities

Retaining and enhancing existing landscaping where possible

Site Location and Policy Features

# Development Proposals

## Our Proposals for Tyneview Park

Although we are still in the very early stages, our goal remains clear: to create a high-quality living environment that integrates seamlessly with the existing built and natural surroundings. The development will deliver a diverse range of housing options, including affordable homes and larger family homes. By offering variety, we aim to foster a sustainable, inclusive and vibrant mixed community. The Block Plan below shows how the structure of the site could be planned.

### Key

- Site Area
- Developed Area - Approximately 214 Homes
- Wayfinder Plots
- Landscaping

## Key Facts for House types

Feature ecological enhancements such as bird boxes, bat boxes and hedgehog highways

Use low-waste, eco friendly materials whenever possible

Maximise natural light and ventilation for healthier, energy-efficient living spaces

Take inspiration from homes around the area, to blend seamlessly with the local character

Built with energy efficiency in mind, featuring triple glazed windows, waste water heat recovery and solar panels

Appeal to a range of customer needs and wants

*What we would like from you, and what you can expect from us*

After reviewing our initial proposals, we encourage you to share your thoughts. Whether you have questions, comments or concerns, we're here to listen. Speak with us directly or complete one of our feedback forms - we appreciate your input.

Following this consultation event, your input will play a key role in refining our layout design and addressing any concerns raised.

You can continue to contribute by submitting further comments through our dedicated email address.

Please complete one of the forms provided or contact us:
